

**Week
1**

Fairy Tales

Dungeons and dragons! We are starting off this summer with some mythical creatures! Campers of all ages will explore the many fairy tales and their characters. Campers will learn about story development, authors, illustrators, and the difference between fantasy and reality. Their imaginations will be ignited! Each child will have a caricature drawn of their head on a dragon's body!

**Week
2**

Healthy Bodies

This week is all about health! In order for our campers to grow up strong, they must keep their bodies healthy! Young Explorers will learn about the importance of exercise and eating from all the food groups. The School Age Campers will explore further and learn about calories while they count and track their active minutes. A jump rope event will show all campers a way to exercise their way to health!

**Week
3**

The Five Senses

This week campers of all ages will learn about their five senses: touch, smell, sight, hearing, and taste. Campers will participate in classroom experiments using all of their senses. They will also use their senses to create artwork this week. All campers will travel to pick strawberries and use their sight to discover the perfect berry, while using their other senses to pull and eat their berries!

**Week
4**

In the Science Lab

This week our campers will learn all about science! Our younger campers will conduct small experiments while the School Age Campers will become mad scientists! They will all learn about electricity during our Lab event! Each camper will explore the use of electricity when it comes to light bulbs, buzzers, and more!

**Week
5**

Up, Up, and Away!

This week is all about being up in the air! Young campers will learn about things that fly: airplanes, birds, hot air balloons, and more! Our School-Age campers will learn about trajectories and momentum with flying objects. This week will have an exciting visit from a funny group of performers that will teach the campers about juggling and balance. Look out for a big finale!

**Week
6**

Fourth of July

CRASH! BOOM! Our summer program continues with a BANG! Young Explorers will discover colors, shapes, and sounds associated with the 4th of July holiday. School Age Explorers will have the opportunity to explore density, make patriotic towers, and write riddles and poems in honor of our country's birthday.

**Week
7**

Dinosaurs

Dinosaurs and fossils! This week our Young Explorers will learn about dinosaurs and their large size. They will compare dinosaurs to current animals and structures. Our School Age Campers will learn about time periods and specific dinosaur traits. This week we will have a visit from a dinosaur or two... and their trainers!

**Week
8**

Bubbles!

Bubble, bubble, pop! This week our campers will learn all about bubbles. The younger campers will explore bubble shapes and the different states of matter. The older campers will learn about how bubbles float and why they are transparent. Make sure to send swim suits with your campers this week! All campers will have a blast in the foam party!

**Week
9**

Bears, Oh My!

Lions, tigers, bears, oh my! This week is all about animals! Young Explorers will learn about the differences between zoo, jungle, farm, and domestic animals. Our School Age Explorers will learn about the different habitats, diets, and characteristics of animals, and especially bears! Each camper will have the opportunity to stuff their own bear to take home!

**Week
10**

Trains

Chug-A, Chug-A, Choo Choo! This week is all about trains! The Young Explorers will learn about traveling and train tracks. The School-Age Campers will explore magnetic movement and time schedules. This week we will have a special visit from a trackless train to give the children a fun train ride! All Aboard!

**Week
11**

Waterworks

Ready! Set! Get wet! The final week of camp will cool our campers off! Everyone will get wet during Waterworks week! The younger campers will explore sensory water activities while the older campers learn about evaporation and other matter changes along with how to make water flow. One final water event will have everyone soaked!
